

Department of Science

Pragyan Science Forum and Mathematica Forum

Report on

“AVIRATA 3.0”

Date: 25th August to 15th September, 2025.

Place: NCMS

No of Participants: 110 Students.

Learning Objectives:

- To promote collaborative problem solving and application of core science and mathematics concepts.
- To strengthen short-term presentation and communication skills through PPT presentations and group discussions.
- To enhance logical thinking and time-bound problem solving through relays, quizzes and workshops.
- To create interest in applied sciences by exposing students to interdisciplinary tasks and competitive formats.

Brief write-up on the Programme:

The Department of Science organized a series of competitive and collaborative events under the banner **AVIRATA 3.0** to provide students with a platform for applying mathematical and scientific reasoning in timed, team-based formats. Students registered in teams (6 members per team) and took part in five structured activities held between late August and mid-September 2025. Events combined individual accountability (mock tests and relay problem solving), team collaboration (problem-solving workshop), and communication skills (PPT presentations). Faculty members from Mathematics and Applied Sciences supervised the events, verified solutions, and provided formative feedback. The programme encouraged active participation and healthy competition; winners were recognized with prizes.

Competition Details:

AVIRATA 3.0 comprises **five distinct activities**, each designed to challenge different aspects of students' academic and extracurricular abilities.

1. Mock Test (25/08/2025)

- **Participants:** Two members from each team
- **Focus Areas:** Mathematics, Physics, Aptitude
- **Objective:** To assess the students' conceptual understanding and analytical skills.
To evaluate their speed, accuracy, and problem-solving abilities.

2. Team Relay Challenge (29/08/2025)

- **Participation:** Entire team (6 members)
- **Procedure:**
 - Each team member must solve one problem correctly before the next member can begin.
 - All answers must be verified by the facilitator before passing the question to the next participant.
 - Incorrect answers require students to correct the solution before continuing.
- **Winning Criteria:**
 - The fastest team to solve all problems correctly wins.
 - If no team completes all questions, the team with the highest number of correct answers within the given time is declared the winner.
- **Objective:** To enhance logical reasoning, speed, and coordination through a strong relay-based problem-solving approach.

3. PPT Presentation (02/09/2025)

- **Participants:** One member from each team
- **Focus Area:** Applied Sciences
- **Duration:** 6 minutes for presentation, 2 minutes for Q&A
- **Objective:** To improve communication skills, presentation techniques, and subject knowledge.
To encourage students to present scientific ideas clearly and creatively.

4. Problem-Solving Workshop (04/09/2025)

- **Participation:** Entire team
- **Procedure:**
 - Students work together to solve selected challenging problems within the given time.
 - Facilitators may provide occasional hints, but teams must present their own logical solutions.
 - A group discussion follows, where teams explain their reasoning and approach.
- **Objective:** To foster collaborative learning and analytical thinking.
To explore multiple methods of solving the same problem.

5. Team Quiz (15/09/2025)

- **Participants:** Entire team
- **Rounds:** 3 rounds
- **Focus Areas:** Physics, Mathematics, General Knowledge
- **Objective:** To test quick thinking, recall ability, and subject knowledge.
- **Time Allocation:** Each team will have approximately 5 minutes for answering.
- **Outcome:** Top three scoring teams will be awarded prizes.

Judges for the Competition:

01	Mr. Ananda S D	
02	Mr. Darshan	
03	Ms. Sumeena	
04	Mrs. Supriya	

Result of Competition:

18 teams had participated in the competition and the top three teams were awarded.

Nandashree .M Manjushree S N Sushma P S Milana N Deekshitha Sushma G Y	Varshini V Charanya Nithyashree Sunena Fasiha Sulthana Swapna D	Jeeva N Vilas Gowda Venkatesh Afshan Taj Manyashree Navyashree

Learning Outcomes:

- To enhance students' analytical and problem-solving skills.
- To promote teamwork and collaborative learning.
- To develop effective communication and presentation abilities.
- To strengthen conceptual understanding in Mathematics, Physics, and Aptitude.
- To build confidence, creativity, and time-management skills through competitive activities.

5. Team Quiz (15/09/2025)

- **Participants:** Entire team
- **Rounds:** 3 rounds
- **Focus Areas:** Physics, Mathematics, General Knowledge
- **Objective:** To test quick thinking, recall ability, and subject knowledge.
- **Time Allocation:** Each team will have approximately 5 minutes for answering.
- **Outcome:** Top three scoring teams will be awarded prizes.

Judges for the Competition:

01	Mr. Ananda S D	
02	Mr. Darshan	
03	Ms. Sumeena	
04	Mrs. Supriya	

Result of Competition:

18 teams had participated in the competition and the top three teams were awarded.

Learning Outcomes:

- To enhance students' analytical and problem-solving skills.
- To promote teamwork and collaborative learning.
- To develop effective communication and presentation abilities.
- To strengthen conceptual understanding in Mathematics, Physics, and Aptitude.
- To build confidence, creativity, and time-management skills through competitive activities.
