One day Workshop on
Decoding Share Prices: A Technical Analysis Approach

Date: 28-03-2025

Place: Seminar Hall

Class: PG Students

Number of beneficiaries: 85 Students.

Resource person: Dr. Saravana Krishnan V

Asst Prof Dept. of Commerce & Management
Christ University, Bengaluru

Objectives:-

- ❖ **Introduce Candlestick Charting:** Provide a comprehensive introduction to candlestick charting, its history, and its importance in technical analysis.
- ❖ **Explain Candlestick Patterns:** Detail the different types of candlestick patterns, including bullish, bearish, and neutral patterns, and how they can be interpreted to predict market trends.
- ❖ **Application in Stock Analysis:** Demonstrate how to apply candlestick patterns in real-time stock price analysis to make informed trading decisions.
- ❖ **Identify Key Indicators:** Highlight the key indicators and signals within candlestick charts that are crucial for recognizing potential market reversals or continuations.
- ❖ **Enhance Trading Strategies:** Teach participants how to incorporate candlestick charting into their existing trading strategies for improved accuracy and profitability.

Brief write up on the Session:

Investment in Equities is one of the prospective baskets for long term savings and wealth creation. However, this requires careful analysis of the stocks before one takes a decision to invest one's hard earned money. Though historical trend of movement of a scrip / stock helps fairly to a good extent about the prospects of the said stock, it is always advisable to take a call on analytical and proven models, a technical analysis approach, which reduces risk of losing to a great extent.

In this course of decision making, Candle stick model comes to a great help for investors in demystifying the behavioral movement of the stocks. This technique is employed by major fund houses and professional investors / analysts invariably and is widely accepted as a logical tool for decision making.

This is an interesting topic from the academic point of view for MBA (Finance) students.

So, to cater to the needs of the students, this expert talk was arranged which covered the subject topic to fairly a detailed length.

The session was packed with both video and audio tools as well as an interactive mode.

The speaker did adopt a live demo and made students to actively participate in the exercise. It was absorbing, very much related to the curriculum and presented in a interesting and lucid fashion.

It was fruitful from the point of student learners.

Students of final year MBA acknowledged the useful knowledge imparted by Dr. Krishnan.

MBA Prof and HOD, Dr. V. Chandrasekhar Rao thanked the expert speaker for having accepted our invitation and conducting this work shop effectively.

Learning Outcome:

Understanding Candlestick Basics: Participants will understand the basic components of a candlestick, including the body, wick, and color, and what they represent in terms of stock price movement.

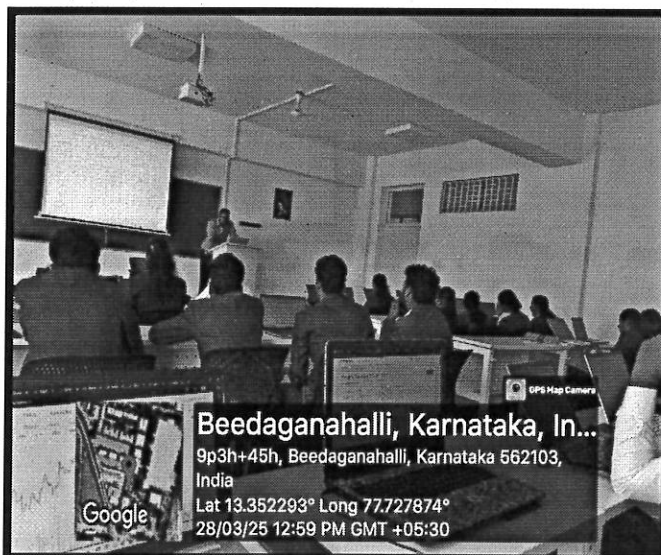

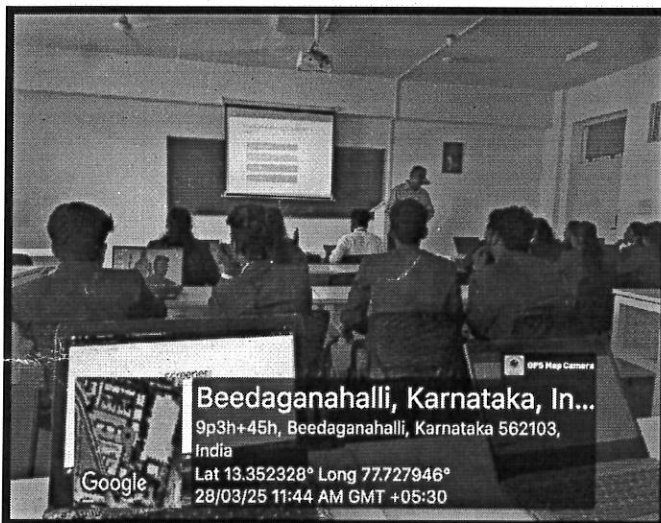

Pattern Recognition Skills: Attendees will be able to recognize and interpret common candlestick patterns, such as doji, hammer, engulfing patterns, and others.

Analytical Skills: Enhanced ability to analyze stock price movements and predict future trends based on candlestick chart patterns.

Strategic Application: Improved skills in applying candlestick analysis to develop more effective trading strategies.

Informed Decision-Making: Increased confidence in making informed trading decisions by utilizing candlestick charts to understand market sentiment and price action.

This expert talk aimed to equip participants with the knowledge and skills to decode the share prices through technical analysis approach ultimately leading to better trading outcomes.
